Art Unit: 2871

#### **DETAILED ACTION**

## **Priority**

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

## Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

# Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sines et al., (Sines), USPAT 5,934,672 in view of applicant's admitted prior art (AAPA).
- 5. Sines shows in Figs. 1-8 and discloses (col. 1, lines 62-67; col. 2, lines 1-67; col. 3, lines 31-57) a gaming machine comprising:
  - a liquid crystal display device including: a liquid crystal panel; and a light guiding plate in which formed with a light transmission area through which passes light and disposed at a rear of the liquid crystal panel, and configured to guide light emitted from illumination means for the liquid crystal panel to the liquid crystal panel (Fig. 4, col. 3, lines 1-57; col. 7, lines 9-67 and col. 8, lines 1-67);

Application/Control Number: 10/697,432

Art Unit: 2871

 a variable display device disposed at a rear of the liquid crystal display device and opposing to the light transmission area, and including a plurality of reels provided in a row each on which a plurality of symbols are arranged;

- light emission means disposed in a proximity of the light transmission area on a side of the reel; and
- a drive unit (not shown) configured to drive the light emission means.

Sines differs from the claimed invention because he does not explicitly disclose the claimed protective member covering the drive unit and having an outer shape so as to be distant from the drive unit at a predetermined distance or more.

The AAPA described in the instant application discloses a gaming machine. The AAPA further discloses that in the prior art gaming machines an inverter circuit used as a power generation circuit of the cold-cathode tube is housed in a protective case so that the inverter circuit is not physically destroyed (page 4, paragraph 0008). Further, since the inverter circuit is housed in a protective member it is obvious that the protective member is at some distance from the inverter circuit.

The AAPA is evidence that ordinary workers in the art would find a reason, suggestion or motivation to employ a protective member to cover the drive unit.

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to modify the gaming machine of Sines by employing a protective member to cover the drive unit for advantages such as to protect the drive unit.

Accordingly, claim 1 would have been obvious.

Art Unit: 2871

# Allowable Subject Matter

6. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tarifur R Chowdhury whose telephone number is (571) 272-2287. The examiner can normally be reached on M-Th (6:30-5:00) Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Kim can be reached on (571) 272-2293. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
